Stage B coupled response — conditional verification candidate
Power [erg/s]
Time [Julian years]
Direct BNV (source)
Photon (source)
Photon (control)
Neutrino (source)
Neutrino (control)
Chemical heating (source)
Excess neutrino (source)
Chemical imbalance [eV]
η_e
η_μ
1e−12
Power ratio
Heating / direct BNV
Net beta / direct BNV
Stored chemical energy [erg]
Control chemistry is exactly zero
